The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous improvement
March 3 rd 2023 from Sault Ste. Marie	Particulate	 Winds from 80.4° true north at 12.3 km/h Event # 1-328K97 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous improvement
March 2 nd 2023 from Sault Ste. Marie	Particulate	 Winds from 36.3° true north at 9.9 km/h Event # 1-317A67 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous improvement
February 27 th 2023 from Sault Ste. Marie	Particulate	 Winds from 84.6° true north at 19.4 km/h Event # 1-31YMOY Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity

		reduction action plan is underway to improve opacity and demonstrate continuous improvement
		Winds from 315.7° true north at 14 km/h • Event # 1-31X22R
February 26 th 2023 from Sault Ste. Marie	Particulate	 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous
		improvement
February 26 th 2023 from Sault Ste. Marie	Particulate	 Winds from 331.7° true north at 11.4 km/h Event # 1-31X1Z0 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous improvement
February 25 th 2023 from Sault Ste. Marie	Particulate, Odour and Noise	 Winds from 159.6° true north at 16 km/h Event # 1-31Y330 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens and conditions to minimize emissions Best Management Plan (BMP) being followed to reduced emissions from site. The implementation of Algoma's stack opacity reduction action plan is underway to improve opacity and demonstrate continuous improvement
February 22 nd 2023 from Sault Ste. Marie	Particulate and Noise	 Winds from 90.2° true north at 4.3 km/h Event # 1-31V0BC Steelmaking fill-out emission as scrap steel contained ice Steelmaking to follow de-icing procedures Best Management Plan (BMP) being followed to reduced emissions from site.
February 21 st 2023 from Sault Ste. Marie	Particulate	 Winds from 209.5° true north at 3.9 km/h Event # 1-2Y8RT8 Cokemaking production identified no interruptions or spills Cokemaking continues to monitor ovens
